

## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

### Listing of Claims:

1.       *(currently amended)* Fabric woven from noble metal filament in which at least one of warp and weft is made of noble gold alloy metal monofilament that is 0.12 to 6.5 N in tensile strength and has a diameter of 70 micrometers or less, wherein the gold alloy contains at least 99.7% gold and a trace of an element chosen from the group consisting of gadolinium and calcium.

2.       *(original)* Woven fabric according to claim 1, wherein the noble metal monofilament is 1.5% or above in elongation percentage.

3-7.     (canceled)

8.       *(new)* Fabric woven from noble metal filament in which at least one of warp and weft is made of gold alloy metal monofilament that has a diameter of 30 to 70 micrometers, wherein the gold alloy contains at least 99.7% gold and a trace of an element chosen from the group consisting of gadolinium and calcium.

9. (new) Fabric woven from noble metal filament in which at least one of warp and weft is made of gold alloy metal monofilament that is 0.12 to 6.5 N in tensile strength and has a diameter of 70 micrometers or less, and wherein the warp and weft monofilaments are different from each other in at least one of material and diameter.

10. (new) Fabric woven from noble metal filament in which at least one of warp and weft is made of gold alloy metal monofilament that has a diameter of 30 to 70 micrometers, and wherein the warp and weft monofilaments are different from each other in at least one of material and diameter.

11. (new) An article of apparel made at least in part of a fabric woven from noble metal filament in which at least one of warp and weft is made of gold alloy metal monofilament that is 0.12 to 6.5 N in tensile strength and has a diameter of 70 micrometers or less.

12. (new) The article of apparel according to claim 11, wherein the gold alloy contains at least 99.7% gold and a trace of an element chosen from the group consisting of gadolinium and calcium.

13. (new) An article of apparel made at least in part of fabric woven from noble metal filament in which at least one of warp and weft is made of gold alloy metal monofilament that has a diameter of 30 to 70 micrometers.

14. (new) The article of apparel according to claim 13, wherein the gold alloy contains at least 99.7% gold and a trace of an element chosen from the group consisting of gadolinium and calcium.

15. (new) An article of garniture made at least in part of a fabric woven from noble metal filament in which at least one of warp and weft is made of gold alloy metal monofilament that is 0.12 to 6.5 N in tensile strength and has a diameter of 70 micrometers or less.

16. (new) The article of garniture according to claim 15, wherein the gold alloy contains at least 99.7% gold and a trace of an element chosen from the group consisting of gadolinium and calcium.

17. (new) An article of garniture made at least in part of fabric woven from noble metal filament in which at least one of warp and weft is made of gold alloy metal monofilament that has a diameter of 30 to 70 micrometers.

18. (new) The article of garniture according to claim 17, wherein the gold alloy contains at least 99.7% gold and a trace of an element chosen from the group consisting of gadolinium and calcium.
